NATIONAL LEVEL WEBINAR ON
INTELLECTUAL PROPERTY RIGHTS AND
PATENT FILING

IQAC
19/12/2021

Introduction: In this postmodern world, intellectual property rights have a significant influence on international trade and indigenous trade of every nation as well. Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. I am very sure that all the concerned details of IPR and Patent Filing will be shared in detailed by our today's guest in his talk.

Objectives: The main objective of this One Day Webinar on IPR and Patent Filing was to create the awareness regarding Copyright Act/IPR and Patent Filing. Intellectual Property Rights and all rights are associated with intangible assets owned by a person/institute or company and protected against use without consent by other(s). The objective of this webinar was to spread awareness the IPR laws made by Government. Intellectual Property Laws are to inspire innovation and to provide incentives for innovations by granting protection to inventors which will allow them to recover research and development investments and gain the benefits of their inventions, research for a limited period of time.
